

Share of Acute Patients and Supply Days of Opioids in Any 365 Day Period^[1]

	Acute Patients	Supply Days in Any 365 Day Period				
		1 to 7 Days	8 to 14 Days	15 to 30 Days	31 to 42 Days	> 42 Days
All Patients	82.6%	49.9%	14.4%	15.5%	2.8%	17.4%
Patients with Flagged Prescriptions	50.2%	20.4%	10.8%	14.1%	4.9%	49.8%

Source: McCann Backup

Note:

[1] Calculated using Walmart dispensing data which ranges from January 2, 2006, to April 25, 2018. A patient is classified as acute if their supply of opioids did not exceed 6 weeks in any given 365-day period. The supply days in any 365-day period is the largest number of supply days of opioids observed in any 365-day period for a patient. A patient is classified as having a flagged prescription if the patient fills a prescription flagged by Dr. McCann in the Second Supplemental McCann Report.
